

# NEW YORK BIGHT

...allocated to Massachusetts and Boston Harbor is allocated to New York because neither of the regional sites have  
 offtake contracts, offtake location was assigned based on state offshore wind energy procurement goals. For New  
 York Bight projects, Atlantic Shores Offshore Wind Bight, Attentive Energy, Community Offshore Wind, and  
 Leading Light Wind are allocated to **New Jersey**. Bluepoint Wind and Vineyard Wind Mid-Atlantic Wind are  
 allocated to New York. It is likely that future procurement actions will impact the size of these projects, and which  
 state they ultimately sell power to.
